Contribution Log — Sprint 2

Team Member: Johan Asangue Tchoupa (40308923), @JohanAsangueSchool

Purpose

Feature development. Let users edit their profile and credentials from the account page.

Contributions

- Built the editable account form (first name, last name, email, phone, postal code) and a separate password change form.
- Added the server actions `updateAccount` and `updatePassword`.
- Added a server-only admin Supabase client so an email change is applied right away, without a confirmation email.
- Added validation schemas for both forms and updated the user profile context so the header refreshes after an update.
- Added the Supabase `UPDATE` grant and RLS policy on `profiles` so users can only update their own row and cannot change their account type.

- Commits: `ffa85f6` (+331 / −18, 6 files), merged into `main` in `e582002`
- Issue: #13 US-01: Job Seeker Profile Page

Time Spent

2 h

Responsible Person: Johan Asangue Tchoupa

Task 2.4: Recruiter Job Posting Management (US-08)

Purpose

Feature development. Let recruiters create, edit and publish job postings.

Contributions

- Created the job create/edit page (`/jobs/edit`) with a loading state and a validated job form schema.
- Added the server actions `createJob` , `updateJob` and `postJob` (publishes a draft so job seekers can see and apply to it).
- Updated the jobs list and job details pages to show the recruiter's own postings and recruiter-only actions.
- Extended the Supabase API helpers, job enums and route protection for the new pages.

- Commit: `e0cc554` (+606 / −26, 10 files)
- Pull Request: #38 Features 4
- Issue: #20 US-08: Job Posting Management Page (closed)

Time Spent

3 h

Responsible Person: Johan Asangue Tchoupa

Task 2.5: Recruiter View of Received Applications (US-06, US-10)

Purpose

Feature development. Show recruiters the applications received for their postings and let them update each application's status.

Contributions

- Extended the applications page with a recruiter view listing the applications received for each posting.
- Added the `updateApplicationStatus` server action (Applied, Under Review, Interview, Offered, Rejected).

- Added a Supabase migration granting `UPDATE` on the `status` column of `applications` only; existing RLS policies limit updates to the recruiter who owns the job.
- Added the application status enum and a status color palette shared by the job seeker and recruiter views.
